DETAILED ACTION

Remarks

1. In response to the After-Final Amendment filed on 07-August-2007, claims 22-26 are canceled per Applicant's request. Therefore, claims 1-21 and 27-30 are presently pending in the application, of which claims 1, 17 and 21 are presented in independent form.

Allowance

2. Claims 1-21 and 27-30 are allowed over the prior art made of record.
3. The following is an examiner's statement of reasons for allowance:

Applicant has canceled the remaining rejected claims (22-26). All other claims pending in the Application were indicated as "allowed" in the previous Office Action.

Applicant's Terminal Disclaimer, filed on 11-december-2006 (approved by the Office on 26-December-2006), overcomes the previously cited Double Patenting rejection on the claims of the instant Application.

The prior art of record, do not disclose, teach, or suggest the claimed limitations of (in combination with all other features in the claim):

one or more data crystals storing one or more data records in an obfuscated format;

one or more iterators, each iterator programmed to access, deobfuscate, and return at least one of the one or more data records in response to a data request;

a key crystal granting access rights for the database system whereby the one or more data crystals, one or more iterators, one or more queries, and key crystal regulate access to the one or more data records, as recited in independent claim 1.

The prior art of record, do not disclose, teach, or suggest the claimed limitations of (in combination with all other features in the claim):

a plurality of data crystals, each data crystal containing at least one data record employing an obfuscation technique;

an iterator programmed to access the at least one data record according to the obfuscation technique;

a key crystal granting access rights for the database system whereby the plurality of data crystals, iterator, at least one queries, and key crystal control access to the at least one data records, as recited in independent claim 17.

The prior art of record, do not disclose, teach, or suggest the claimed limitations of (in combination with all other features in the claim):

Art Unit: 2165

obtaining a data record and storing the data record in a data crystal in an obfuscated format;

providing an iterator to access and deobfuscate the obfuscated data record;

providing a key crystal authorizing use of the data crystal and the query according to the preauthorized type of data requirement, whereby the data crystal, iterator, query, and key crystal prevent unauthorized access to the data record, as recited in independent claim 21.

Conclusion

4. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Tony Mahmoudi whose telephone number is (571) 272-4078. The examiner can normally be reached on Mondays-Fridays from 08:00 am to 04:30 pm.
